Attachments: removed.txt

Hi Melisa

On behave of Juliet Hanifin, I was requested to pass along that EPA will be at the site around 7 am and need access. Juliet and Janet Wetul will be there.

Regards,

Jeff

Subject: Sims sediment sampling schedule update

Juliet:

The latest projection we have is that the ship at the wharf 3 may finish and depart tomorrow. If that happens, our field team will aim continue sampling, focusing on the locations north of the vehicle ramp: core at station 52 an the two ponar locations. These locations will be accessed via a smaller boat required to get into this area.

If we work tomorrow, we won't do any coring tomorrow south of the conveyor, e.g. station 7 where your team plans to observe sampling on Friday.

Our revised estimate for sampling at station 7 on Friday is 7:30 am. Please confirm that your colleagues will be onsite at this time to observe. If EPA elects not to observe, we will take some video of the coring process as you mentioned and photographs of the core.

Regards, Jeff
